Documentation

Documentation of the Lern With Us website. Please read this carefully.

Roles

- There are 2 roles in this website, it can only be changed by admin or you can change it from PHP my admin.

PhpMyAdmin

Admin tab

- Roles are given using number.
- If the number is 0 it is User, they have no access to admin tab.
- If the number is 1 it is Admin, they have all access to admin tab

Tab from admin view

Dashboard

A helping small manual is given in Dashboard for all the people who can access admin tab so it will be easier for everyone.

Index

Index is used to display pushed data from database in table. It can access by clicking manage button given below.

Or the button given below on create page
 .

In order to display option as first picture you should press option with < arrow on sidebar

There are 4 more interactions within Admin area

1. Create

As title indicates, create is used to push data in database so we can retrieve data and use it to display in frontend. We can create it by using these options

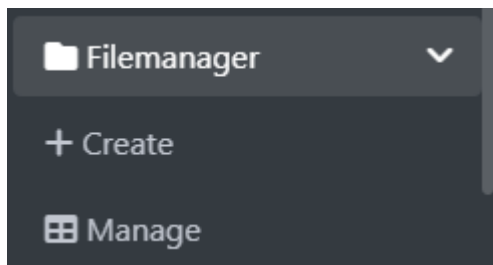

Or using this icon.

2. Edit

Edit is simply used to edit the inserted data. If user wants to make changes in certain field. We can find edit inside (index)Manage option.

First, we need to click manage after clicking on file manager

Then this will be shown

S.N	Title	Image	Image Name	Action
1	mefo@mailinator.com		-1683099327.jpg	

The option given below is used to edit.

Be sure to press Submit after editing.

3. Delete

Delete is represented using button. It will once ask for conformation and delete data from database permanently

4. View

View is represented using this option. We can only see data we inserted using this option.

File Manager.

File manager is the most useful thing in the side bar. In File manager we push image name to database and we push related image from computer to relative website folder.

 So why File manager is most useful because if there is no images uploaded in File manager no images will be shown on other option. Basically, File manager stores image and we can use same image in many other database tables so it will take less space on database and there is low risk of data loss.

Sidebar.
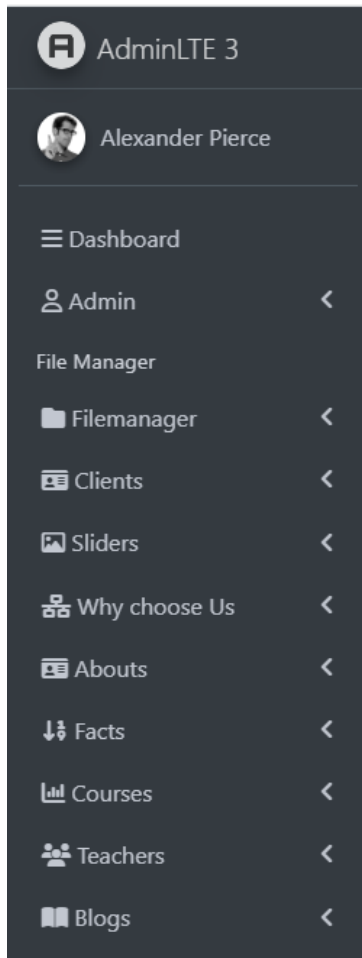

Everything that works on front end is here on side bar

Like landing page Slider is on slider option.

Everything is dynamic so admin can play with data accordingly.

Setting

Setting is all the side config beside all the necessary table side config is used to configure other stuff like logo etc. Setting can be found in side bar. The list are: -

S.N	SiteKey	SiteValue	Action
1	Logo	-1685030231.png	
2	partner1	Minima doloribus nob	
3	partner2	Enim est fuga Labor	
4	partner3	Omnis aut voluptatem	
5	Gmail	sdwasd@gmil.com	
6	Tel_no	061-224433	

‹ 1 2 ›

And so on..

You can change site value as necessary

siteKey	SiteValue
Gmail	sdwasd@gmil.com

Submit

But Site key is predefined.

2.) **whyChooseUsDesc**

whyChooseUsDesc is description below Why Choose

Why Choose Us?

Us. Recusandae Iure est Lorem ipsum dolor sit amet consectetur, adipisicing elit. Iste, veritatis.

3.) Logo

Logo is logo in navigation bar and footer.

Learn With Us
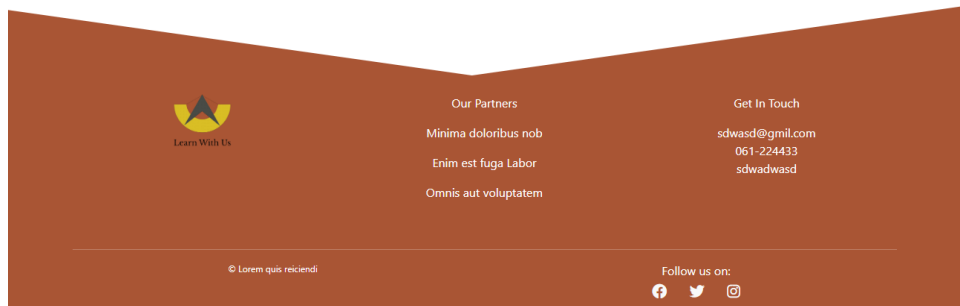

1.) Social links

The logos below footer are social links

You can change it from here

2	facebook_site	https://www.facebook.com/		
3	twitter_site	https://www.twitter.com/		
4	instagram_site	https://www.instagram.com/		
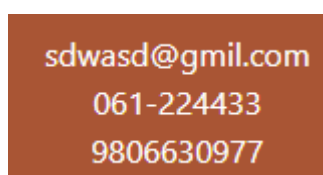

The above figure consist of

1st) Email

2nd) Tel number

3rd) Phone number

You can change it from.

5	Gmail	sdwasd@gmil.com	✏️ 👁️ 🗑️
6	Tel_no	061-224433	✏️ 👁️ 🗑️

1	Phone	9806630977	✏️ 👁️ 🗑️

2.)Partners

Partner name of footer can be changed from here in settings

2	partner1	Minima doloribus nob	✏️ 👁️ 🗑️
3	partner2	Enim est fuga Labor	✏️ 👁️ 🗑️
4	partner3	Omnis aut voluptatem	✏️ 👁️ 🗑️

Only 3 name can be given so choose wisely.

3.) Copyright

Copy right can be seen on bottom left corner.

© Lorem quis reiciendi
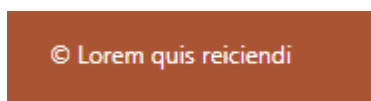

You can change it from here

5	copyright	Lorem quis reiciendi	✏️ 👁️ 🗑️

its located in settings.
